Introduction - Fizz Traveller 2

Welcome to Fizz Traveller 2

Whether you travel alone or with others, make room for one more. Fizz Traveller 2 is the perfect travelling companion. Fizz Traveller 2 has full multilingual support for English, French, German, Spanish, Dutch and Italian

With Fizz Traveller 2 you can: -

- Track the time in up to 6 major cities from around the world.
- Perform an Internet city lookup helping you add to the default database of over 200 world cities. The lookup supports over 26,000 US cities and 32,000 international cities
- Set alarms in your time zone or any time zone for any city.
- Understand who's in daylight and who's in darkness with **Fizz Traveller 2's** real-time, world daylight map.
- Get weather forecasts for today, 48 hours or 5 days ahead, for any city in **Fizz Traveller 2's** database. See weather maps and satellite maps for any of your favorite cities.
- See likely Airport Delays for all major airports
- See weather and the time in your six world cities
- See international dial codes.
- Make schedules, trip itineraries and to-do lists
- Do all your currency and other conversions.
- Configure your interface with customizable skins and themes
- Sync your device time with an Internet atomic clock.
- See the time and weather from the home screen of your phone, with our home screen plug-in

NB. Internet time syncing, city lookup and weather forecasts require your device to have an active Internet connection.

Installing Fizz Traveller 2

- Double Click on setup.exe
- Follow the on-screen installer dialogs.
- Check your device and install either to phone or storage card
- Installation may take a long time, as there are a lot of small files to install.

Upgrading from a Previous Version of Fizz Traveller

When you upgrade to Fizz Traveller 2, all information from earlier versions will be lost, you can run both versions side by side, but we would recommend removing Fizz Traveller 1.2 before installing Fizz Traveller 2

License Agreement

Please read and accept the license agreement before completing the installation of Fizz Traveller 2

Additional Weather disclaimer

ALL WEATHER DATA IS PROVIDED ON AN "AS IS," "AS AVAILABLE" BASIS. FIZZ SOFTWARE LTD. USING CUSTOM WEATHER DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTIES OF ACCURACY, COMPLETENESS, CURRENTNESS, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Launching Fizz Traveller 2

Once installed, Fizz Traveller 2 will be available in the Programs list.

- Select the **Fizz Traveller 2** icon from the Programs list
- Select your country's **flag** to select the desired language

You can change the language **Fizz Traveller 2** runs in by using the [options screen](#).

Personal Data Files

Fizz Traveller 2 will create several files suffixed with **.dat** in the **Fizz Traveller 2** installation folder on your device. These files are used by **Fizz Traveller 2** to manage your personal settings and data. The fizztraveller.dat file created by earlier versions is not compatible with Fizz Traveller 2.

If you want to backup your data please backup all files suffixed with **.dat**.

Registering Fizz Traveller 2

Fizz Traveller 2 Registration Information

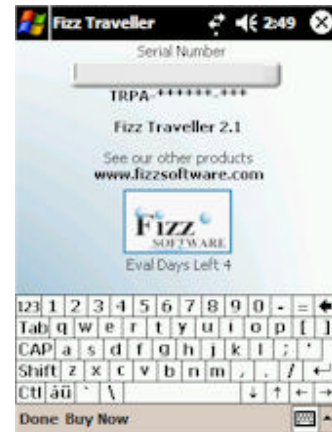

Fizz Traveller 2 will function for 5 days before you are required to enter a valid registration code. You may register either by selecting Register from the Options Menu available from the home time screen or wait until after 5 days in which case the only available option will be the registration screen.

To register, simply enter the **serial number** provided when you purchased the product.

Make sure you enter the serial number exactly as shown including the '-' characters. Make sure there are no special characters or spaces anywhere in the number, including at the end and make sure that the serial number you are using matches the product you are registering, e.g. Do not use a Fizz Traveller 2.x serial number with version 1.2 and vice versa.

Select **Done** to continue.

Buy Online

You can now buy Fizz Traveller 2 online using your PC or Mobile device. If you are using Fizz Traveller 2 on your device, from the registration page use the Menu option, 'buy now'. You will be taken to our mobile online store. It's safe, secure and powered by WorldPay.

If you want to buy online using your PC, visit our site www.fizzsoftware.com and see our online store.

Fizz Traveller Home Screen

The **Fizz Traveller 2** main screen is called the home screen. You can configure **Fizz Traveller 2** to track 6 world city times, one being your main home time.

The home screen shows the date, time, current weather (if any has been downloaded) and alarm status. To configure any visual aspects of the home screen, select Options from the Menu. If no weather has been downloaded or it is out of date ??? will be displayed.

Smartphone

Using the soft-key MENU you can choose Change..... which will take you to the [city edit screen](#). From this screen you can configure what city is displayed on your home screen.

Pocket PC

Clicking on the Options menu you can choose Change..... which will take you to the [city edit screen](#). From this screen you can configure what city is displayed on your home screen.

Home Alarm

Using the MENU you can toggle the current default alarm on/off or create a new alarm if s default one does not exist or the default alarm has expired.

MENU - Change : City

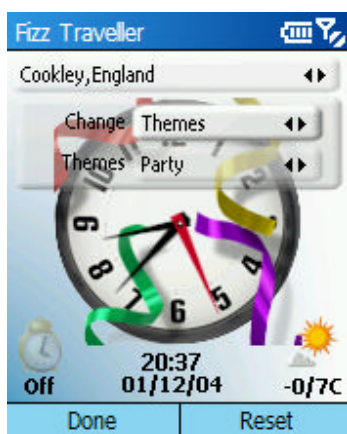

Selecting this menu option will open the city edit screen allowing you to create new cities or edit/delete existing ones.

MENU - Fetch Forecast

Selecting this menu option will download the 5-day forecast for your current Home City

MENU - Show 5 Days

Selecting this option will show you the 5 day forecast for the currently selected city, if one is available. To remove this pop-up, select the menu option again or on the Pocket PC, you can tap the Pop-up to remove it.

MENU - Options

Selecting this menu option will allow you to fully customize your home screen and other details. See the options section for more details

MENU - Alarm On/Off

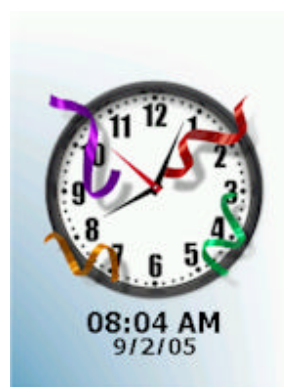

This option will toggle your default alarm on and off. You must have a valid alarm set and it must be set as the default for this option to work

MENU - Register

Selecting this menu option will open the [register screen](#).

MENU - Full Screen (Pocket PC Only)

Selecting this option will remove all menus and leave you with just the clock and date on the screen. You can also tap the clock-face to toggle full screen mode.

World Times

World Times / Cities

The main world times screen shows the date and time for any six cities stored in the city database. One city is always the **HOME** city, which is the city that is displayed on the home screen. You can quickly make one of the six favorite cities your home default city simply by selecting it.

Smartphone

Using the soft-key Change City will take you to the [City edit screen](#) for the specific city that you have currently got selected - you can now change this city or add, edit & delete others.

New.

You can edit the selected city by using the MENU option **Edit**.

You can delete a city from the database using the MENU option **Delete**

From this screen you can also see the daylight saving information if the city has one and the dial-code and current time for any of the cities listed.

Edit the city information and select update to update the city database.

Pocket PC

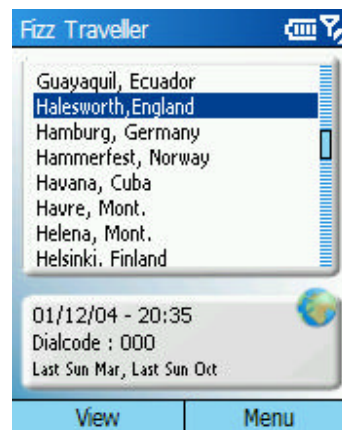

Using the Options Menu Change City will take you to the [City edit screen](#) for the specific city that you have currently got selected - you can now change this city or add, edit & delete others. Tapping on the ? icon will give you more information about your currently selected city, such as the dial code if one has been entered, sun rise and sun set times and the GMT.

City Edit Screen

The city will be selected in the city list ready to be changed to another.

You can select another city from the list then press the action button or use the soft-key MENU Select option to change the previous home or 6 world city to the newly selected city.

You can create a new city by using the MENU option

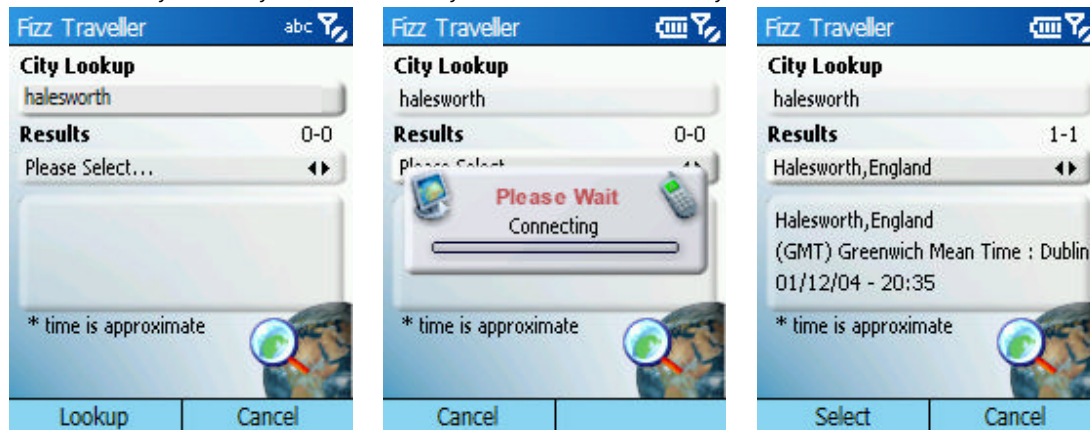

Edit City Information

The city information screen is shown if you edit a city.

- **City** - The name of the city used in the city lists or displayed with the clocks.
- **Latitude / Longitude** - The cities global position. This will be used when displaying the city's location on the daylight/distance map. If you do not know it, see City Lookup below.
- **Time zone** - The time zone for the city. This is the offset from GMT that will be used when showing the time or setting alarms for this city
- **Dial code** - The cities international dial code.
- **City ID** - This is populated automatically by the lookup process. Please do not alter these numbers or weather forecasts for the city will not be correct.

New City

An important feature of Fizz Traveller 2 is the Internet City Lookup available when you add a new city to the database. This will ensure you not only have the correct city information but also allows you to fetch weather forecasts.

From the City list select New City from the MENU. Enter as much of the city name as possible and use the **Lookup...** option.

If you live in the United States - you can enter a ZIP code.

This will perform an Internet search for the city name entered and return a list of matching cities. Tab down to the Results selector and scroll through the cities that have been found. You can also press the Action key to show the full list. When you find the correct city, select it and choose the Menu Select. This will take you to the City Information screen as described above, here you can check that all the details are correct and when you are happy, choose Menu Update.

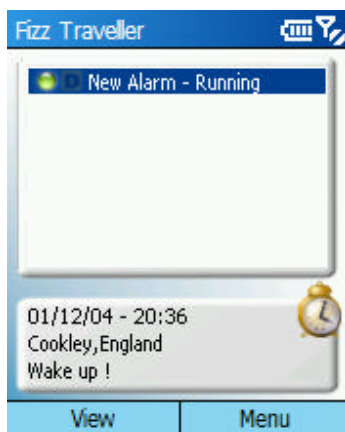

Selecting a city from the list then **Select** will return you to the City Information screen. The benefit of city lookup is the city **longitude**, **latitude** and **time zone** will be set for you. You can now fetch weather forecasts for this city.

Note: The city time zone will be an estimate. You may need to configure this manually on the City Information screen.

Alarms

Fizz Traveller 2 has the ability to set multiple alarms, each alarm having various characteristics such as sounds, message and time zones.

The main alarm screen is accessed via the view scrollbar.

This screen shows which alarms have been created, are running or have expired. Selecting an alarm shows the alarm details below the list.

Default Alarm

One alarm can be set as the Default alarm. This alarm is shown on the home screen, and can be toggled on and off from there saving you time navigating to the alarm screen. To set an alarm as the Default alarm, select the alarm from the list and from the MENU select "**Make Default**". On the Pocket PC, you can tap the D button to make the alarm the default.

Activating an Alarm

You can activate an alarm that is not expired from the alarm list. Next to each alarm is an indicator as to whether the alarm is running or not. Alarms with a green spot are running, those with a red spot are not. Use the navigation pad to select an alarm in the list, then use the action key to set or unset the alarm. On

the Pocket PC, you can tap the green or red button to toggle the alarm.

Creating an Alarm

From the alarm list you can create a new alarm. From the MENU select "**New**" and follow the information below on **alarm options**.

Edit Alarms

To edit an alarm, select the alarm from the alarm list, then using the MENU select "**Edit**". Please follow the information below on **alarm options**.

Delete Alarms

From the alarm list you can delete alarms. Select the alarm from alarm list, then using the MENU select "**Delete**" button. Confirm the warning message shown and the alarm will be removed.

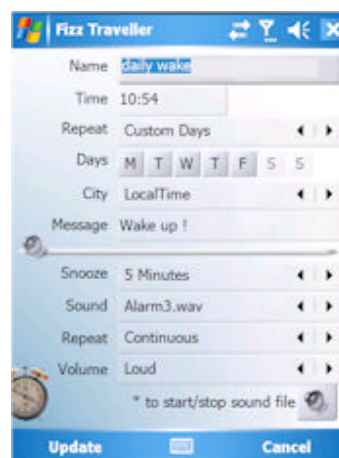

Dismiss Early

If you have a pending alarm – selecting dismiss early will cancel the pending alarm and activates the next repeating time if this is a repeating alarm.

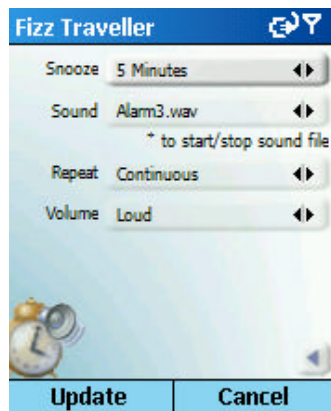

Alarm Options

If you are creating or editing an alarm, the screen will contain various information.

- **Name** - The name of the alarm that will be displayed in the alarm list
- **Time** - The time of the alarm. This is a 24-hour time.
- **Repeat** - A drop list of options that control if the alarm automatically resets for another date.
 - Once only** - The alarm only triggers once, then expires
 - Daily** - Once triggered, the alarm will be set 24 hours on
 - Weekly** - Once triggered, the alarm will be set 1 week on
 - Working Week** - Once triggered, the alarm will be set every day of the working week, i.e. Monday to Friday only.
 - Monthly** - Once triggered, the alarm will be set 1 month on
 - Yearly** - Once triggered, the alarm will be set 1 year on
 - Custom days** – Once triggered the next day in the cycle will be set
- **Date or Day** – The date or day for the alarm to be triggered
- **City** - The alarm will be triggered using the date and time and selected city time zone. This allows you to set an alarm to trigger on a particular date, when the time in the zone selected is reached. Your device local time is the first listed, followed by your 6 favourite cities but you can choose to set an alarm for any city in the database
- **Message** - When the alarm is triggered, a screen will be shown with the message entered here.

If the update option is faded out, then the date and time of the alarm has already passed. If this is the case you will not be able to set the alarm.

On the Smartphone, Select the bottom arrow to see **MORE OPTIONS**

- **Snooze** - When the alarm triggers the menu can be used to snooze if this drop list is set to a time.
- **Sound** - A drop list of sounds that can be played when the alarm triggers. Pressing the * key allows you to test the sound repeatedly until the * key is pressed again to stop it. If vibrate is selected then no sound will play and the device will vibrate instead. On the Pocket PC, you can tap the sound button to play the sound.
- **Repeat** - The number of times the sound is played when the alarm triggers.
- **Volume** - This option allows you to set the volume of the alarm. System Profile follows the sound volume as set in your current profile. Settings to any other value will override the system sound setting.

On the Smartphone, choosing the bottom arrow will return you to the previous screen.

Set the alarm information, then using the MENU select "**Update**" to confirm changes.

Custom Sounds

Additional alarm sounds can be added to **Fizz Traveller 2** in two ways.

Smartphone

- Add more WAV files to the sounds subdirectory - you will find this in the **Fizz Traveller 2** installation directory.
- Add more WAV files to the folders below :-

\\PSM\\Application Data\\Sounds (Smartphone 2002)
\\Storage\\Application Data\\Sounds (Smartphone 2003)

Pocket PC

Add your .WAV files to the \\Windows directory on your device.

World Map (Smartphone Only)

International Daylight Times

Fizz Traveller 2 has the ability to show a real time map of the world, shading those parts of the world in darkness in a darker color. This gives you a clear representation of what parts of the world are awake or asleep.

The six main cities that you've selected are available above the world map. Selecting a city will force the city to be shown on the map as a flashing dot.

At the bottom of the map screen you will see the current local time of the selected city (the city that is flashing).

International Date and Time

Given the selected world city, the city local date and time is shown

International Dial Codes

Given the selected world city, the cities international dial-code is shown if one is

supplied in the city database.

Sun Rise and Sun Set

The approximate Sun Rise and Sun Set times are shown for each of the selected cities

The current weather for each selected city is also shown if it is available and has been downloaded.

Itinerary

The **Fizz Traveller 2** itinerary screen will help you plan your trips or tasks, making sure you don't forget important things.

The itinerary screen is accessed via the view scroll bar.

If your itinerary task list is empty, use the MENU to create a new task. See below.

If you have at least one task then you will see two controls. A drop list of tasks, and a list below of task items for the selected task.

Each task item for a task has a completed state. The state can either be set to completed or not, either by editing the task item or quickly by pressing the * key. On the Pocket PC you can do this by tapping the status box in the item list.

Smartphone

Pressing the # key will show more information about each task item.

Pocket PC

Tapping the ? button will show more information about each task item.

Tasks

To create a new task use the MENU and select **New**.

Edit Tasks

To edit the main task information, select the task from the task list then use the MENU and select **Edit**.

Delete Task

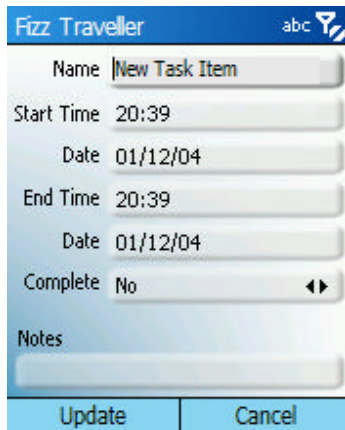

To **delete** a task, select the task from the task list then use the MENU and select **Delete**. Confirm the deletion message and the task and the task items belonging to that task will be deleted.

Task Information

When you create or edit a task you will be shown this screen.

- **Name** - The name of the task, this will be shown in the main task list
- **Task Information** - General information area where you can add anything to do with the task

Enter the task information and select Update to confirm changes

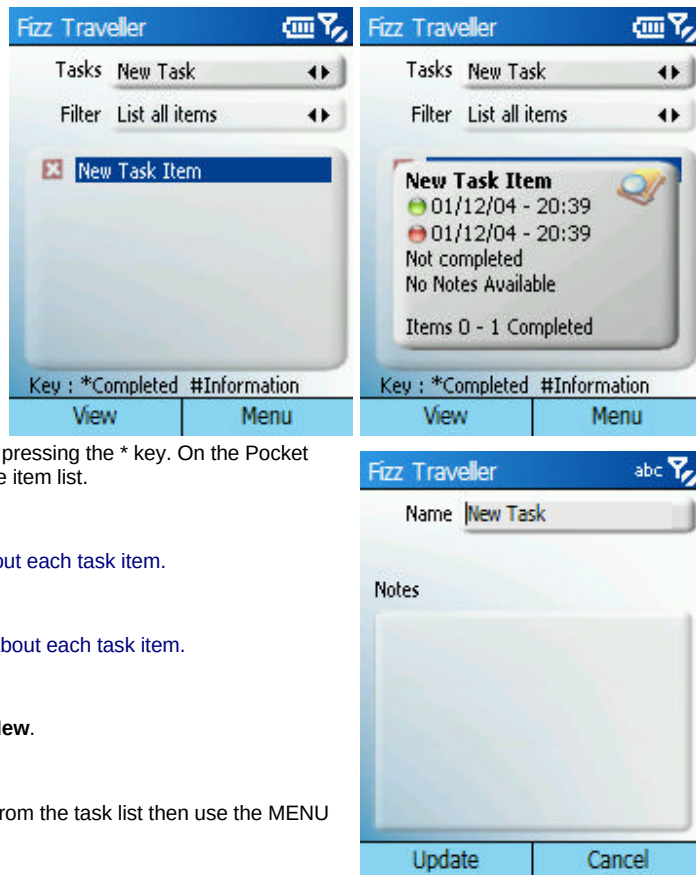

Task Item Information

When you create or edit a task item you will be shown this screen.

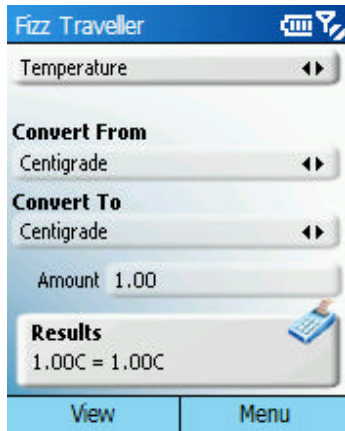

- **Name** - The name of the task item, this will be shown in the task item list.
- **Start Time** - The starting time of your task item.
- **Date** - The start date of our task item
- **End Time** - The ending time for this task item
- **Date** - The end date of your task item
- **Item Complete** - If yes, the item is considered complete.
- **Notes** - General information area where you can add anything to do with the task item.

Enter the task item information and select Update to confirm changes.

Conversion

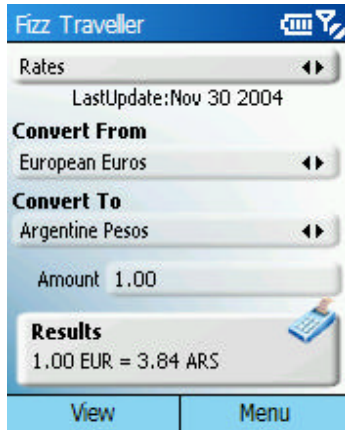

General Conversion

Fizz Traveller 2 now allows you to not only convert currencies, but many other types of conversion as well. Using the Conversion drop list, you can choose the type of conversion you want. For example, currency, length, weights to name but a few.

Fizz Traveller 2 allows you to quickly do currency conversions between 2 currencies from its built in currency database. You can add custom currencies if you so wish, but these will not be updateable via the Internet and therefore you will have to keep them updated yourself.

The main conversion screen is accessed via the View Scroll Panel. The screen shows an amount to convert, two lists, one to convert from the other to convert to and a total.

You can choose from two currency sources, the Bank of Canada and the IMF, choose which one you want to use from the menu.

Converting

To convert an amount:

- First select the conversion you want to perform, e.g. Currency Rates
- Pick the currency you are converting from using the first list
- Pick the currency you are converting to from the second list.
- Press the action key (or on Pocket PC tap the calculator) to convert. Decimal places can be set using the * key on some devices but on others you will need to go to the symbol list to enter decimal places.

The result is shown in the Results area.

Changing either currency from the currency lists will update the total shown.

Changing the Currency Rates

As currency rates fluctuate, you will need to update the rates of the currencies stored in the database. Use the MENU and choose Update Rates to update the currency rates. When you have the first selector on the conversion screen set to Rates, the last time an Internet update was carried out is shown for your information.

Editing Currency Rates

Choose Edit from the MENU.

Adding a new currency

Choose New from the MENU.

Deleting a currency

To delete a currency from the currency list, first select the currency the use the MENU and select "Delete". Confirm the delete message and the currency will be removed.

Update Rates

Fizz Traveller 2 supports an automatic rate update from two Internet sources. The sources are updated on a regular basis helping you keep up with rate changes on the move. See Internet rates below.

Weather

Fizz Traveller 2 supports fetching weather by using a connection to the internet and using **CustomWeather, Inc.**

Three screens are available for displaying and selecting weather reports.

- 5-Day Forecast, including details for the current day
- 48 Hour Forecast

- Maps
- Airport Delays

5 Day Forecast Screen

Fizz Traveller 2 can store a forecast for each of your six chosen favorite cities. On each screen you will see a selector containing the six favorite cities. Moving the selector left or right changes the city and displays the cities forecast if it is available & it is still valid.

The latest weather for the currently selected city shown in the city drop list can be retrieved by using the MENU option "**Fetch Forecast**".

The 5-day forecast screen will show today's current weather and also that for the next 5 days. If no weather has been fetched, NO REPORT will be shown and you need to fetch a new forecast.

Use the navigation pad to select each day and see the details of the weather for that day. On the Pocket PC you can tap on the day to see more detail.

Forecasts for cities

To select weather information for another city in your database that is not in your six-city favorites list, you will need to change one of your six main cities.

Fetching weather

Select "**Fetch Forecasts**" from the menu to use the Internet to fetch the current weather conditions for the selected city.

Fetching weather - All Favorites

You can fetch all your favorite cities forecasts in one go by using the Menu, and selecting Fetch All Cities.

Clearing a forecast

You can clear a cached forecast by selecting the city name in the city drop list, then using the Menu choose Clear Forecast.

Options

Select "**Centigrade/Fahrenheit**" from the menu to display all temperatures on all weather screens in deg.C.

Use the menu to switch screens from the 5-Day forecast, the 48 Hour forecast or the weather maps.

48 Hour Forecast

Shows the weather over the next 48 hours. The % value shown is the chance of precipitation. On the Smartphone, use the navigation pad to select each 24 hr period.

Weather Maps

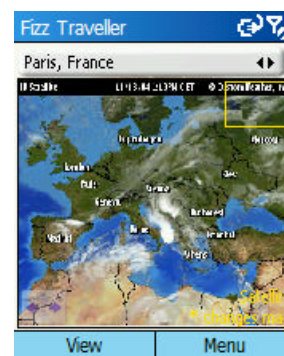

Global weather maps are now supported for particular areas of the world. Selecting weather maps from the menu will take you to the weather map screen. You can select one of your six world cities from the selector across the top. Using the MENU option fetch map will connect to the Internet and download the latest maps.

The map is stored on your device for later viewing offline. When a map is available Fizz Traveller 2 will show the map under the world cities. Additional options available when a map is displayed are:

Smartphone - Pan/Zoom

Zoom - When the map is selected, the map can be zoomed using the navigation pad, pressing right makes the map bigger and left smaller.

- Pan - When you have zoomed in on a map, press the action key and the bottom left icon will change and the navigate pad can be used to pan left/right/up/down across the image. A small map in the top right shows the current position of the on screen image in relation to the entire image
- In Pan and Zoom mode pressing the action button toggles Pan/Zoom
- * Toggles between the satellite map and the weather map
- Focus can only be returned to the city selector when in zoom mode

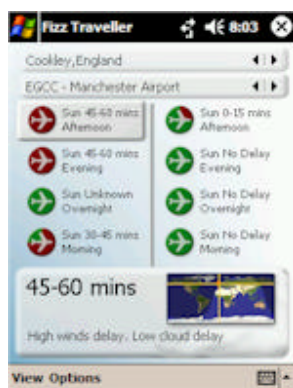

Pocket PC - Pan/Zoom

Zoom - When the map is selected, the map can be zoomed by tapping the left navigation icon, pressing right makes the map bigger and left smaller.

- Pan - When you have zoomed in on a map, you can use the right icon to pan left/right/up/down across the image. A small map in the top right shows the current position of the on screen image in relation to the entire image
- The two middle icons allow you to choose between the satellite map and the weather map

Focus can only be returned to the city selector when in zoom mode

Airport Delays

If you want to see how the weather could affect your travel plans over the next 48 hrs, you can now download airport delays for over 300 major airports around the world. From the MENU Select Airports, choose which one of your six favorite cities you wish to see the delays for and then choose Fetch delays from the MENU The second selector will allow you to choose which airport you want to see the delays for. Select the icon and below it you will see a description, telling you why the delay is occurring

All weather data supplied by CustomWeather Inc

NOTE

The average size of a standard weather forecast fetch for one city, not including maps or airport delays, is generally 7-8 KB. Your service provider sets the cost of your GPRS usage and Fizz Software Ltd takes no responsibility for costs incurred. Please monitor your GPRS download usages at all times.

Options

There are now 5 different options panels available from the main Options selector icon.

General options

This is the first panel that you will see and you will have the following choices :-

Network

You can now select your preferred Data Connection, either Automatic, which is the default and should work in most situations, 'Internet', 'Corp-Network' or 'Proxy'

Language

Fizz Traveller 2 can be set to run in many languages. When initially installed, **Fizz Traveller 2** asks what language you want to run in. That language is always used unless altered using the options screen. To change the language used, select a new language from the drop-list. If the language has been changed - when you select 'Done' **Fizz Traveller 2** will change the language it's running in. We advise you to quit and restart Fizz Traveller 2 before continuing.

Units

Here you can choose which units Fizz Traveller will use and also whether the temperature is displayed as high/low or low/high.

Timeout

There are two options available here, Default means that after a set period of time, set by the operating system, the device Home screen will come to the front. If Override is selected, then Fizz Traveller will always be at the front.

Date/Time

Time throughout the product can now be shown as 24 Hour or shown according to how your locale time setting is defined.

Start Screen

Fizz Traveller 2 can now be set to open on a particular screen when starting. If you'd prefer to see the weather every time you start, just change the starting home screen drop list.

IntelliTimers

To reduce battery usage, a new option is available where Fizz Traveller only creates fast timers (e.g. second hand) when the device is connected to the AC. If not connected slow timers are created (e.g. No second hand).

Cleartype

Choose here whether cleartype is on or off.

Menu Options

Set Device Time - Atomic Clock

Fizz Traveller 2 can set your handheld device from an internet Atomic clock if you have an internet connection. Using the Menu, select **Update Device Time**. **Fizz Traveller 2** will connect via the Internet to the atomic clock, and display the date and time local to GMT.

If you confirm you want the date and time altered, your time will be updated.

NOTE: THIS PROCESS CAN TAKE A LONG TIME TO COMPLETE DEPENDING ON THE NUMBER OF TASKS IN YOUR CALENDAR.

From the menu on this panel you can choose the Register option to see the registration screen and register your product.

Choose the other options panels from the menu or on Pocket PC tap the arrow at the bottom of the screen to cycle through the screens.

Home Screen

Here you can choose from the following options, all applicable to the homescreen plugin.

Highlight

This will allow you to select how much highlight is shown when the plugin is selected.

City Rotate

When this option is turned on, the plugin will automatically rotate through your selected cities.

Show Day Names/Show Day Dates

This option allows you to choose whether dates or days are shown for the forecast on the Homescreen plugin.

The image is a representation of how your plugin will look.

Downloads

This screen allows you to control when the weather is downloaded to your device and also which data is downloaded. When weather data is downloaded, the homescreen plugin is also updated.

The first droplist allows you to select how often you want the weather forecast and currency data updated. Under this you will see the time and date of the last scheduled update that successfully completed and the time and date of the next scheduled update.

The second droplist refers to automatic updates when you dock your device. If this is set to On, then every time you dock your device with Active Sync (and have a valid partnership set-up) then the selected reports for all your favorite cities will be updated.

The third droplist allows you to choose when the scheduled updates should occur, the options are Always, in which case the weather will be downloaded at your chosen time interval regardless of your current connection ie. if your device is connected to your PC, then Active Sync will be used, otherwise GPRS will be used.

Only When Docked allows you to download the weather at the selected interval but only when the device is connected to your PC via Active Sync. This will save your GPRS usage. If you have your device set to download every hour only when docked, then every hour, the device will check to see if it is docked, if it is, then the weather will be updated, if not, then the timer will reset for the next hour.

The checkbox list shows which weather reports and currency updates should be downloaded for any update. The selected reports will be downloaded for all your selected favorite cities.

Tracking

The tracking screen shows how much data has been downloaded to your device.

The first droplist allows you to turn tracking on and off. The second droplist shows you tracking data for the day, month, week, year or all.

Selecting the column of the graph you are interested in will show you the details for that column. The first figure is the number of times that the particular forecast has been downloaded. The second is the amount of data downloaded for that section and the final one is the total data downloaded for the selected period along with what percentage of that total the selected item actually is. You can use the stylus or keypad for selecting the graph columns.

Data is tracked for all downloads.

Themes

You can change the theme, or create a user-defined theme with your choice of Skin, Clock Face, Clock hands and Text Color. You can even choose the transparency of your chosen clock face using the transparency slider.

Effects

Fizz Traveller 2 has got various scrolling effects to make the interface look fantastic. If you have an older device, you can choose to turn these effects off.

Fizz Traveller 2 Homescreen Plug-in

The Traveller home screen plug-in is the ideal way to keep track of your 6 favorite cities date, time and weather conditions from your device home screen. The home screen will be localized in one of 6 languages, the same language you have chosen in Fizz Traveller 2.

Installing the Fizz Traveller Homescreen Plug-in

The plug-in will be installed at the same time as Fizz Traveller 2. To activate it you must first launch Fizz Traveller at least once. When you have done this, the plug-in will appear on your phones Today screen by default, you can turn this off by going to Settings/Today and tapping the Items tab. Deselecting Fizz Traveller will remove it from the Today screen.

NB. You must have Fizz Traveller 2 installed in order for the Home Screen Plug-in to work.

Navigating and Using the Plug-in (Smartphone)

Picking the layout

Once installed, you need to switch to the Fizz Traveller home screen. On your device from the current home screen select Start, Settings, Home Screen. Choose the any of the Fizz Traveller home screen layouts available.

Your home screen should now contain the Fizz Traveller home area. The home area has 5 panels accessed by moving left or right once selected.

Launch Traveller

Pressing action on this panel starts Fizz Traveller.

City current day

This panel shows the city name, date, time and current day forecast if still valid.

City 5-day forecast

Shows the cities 5 day forecast

City 2 day forecast - hours 0 to 24

Shows the first 24 hours of weather in 6-hour intervals for the city

City 2-day forecast - hours 24-48

Shows the last 24 hours of weather in 6-hour intervals for the city

General Information

Pressing action on all information panels except for the launch panel cycles through the 6 cities. So for example, you could move left/right to get to the current day panel, then pressing action cycles through all 6 cities looking at the current day information.

You must have Fizz Traveller 2 installed for the home screen plugin to function correctly.

You will need to have started Fizz Traveller 2 at least once before the home screen plugin shows any information.

The home screen plugin will only work on Smartphone 2003 devices.

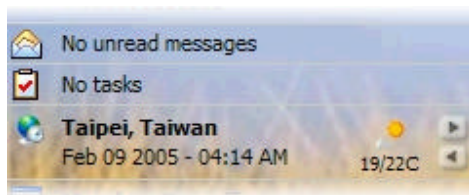

Navigating and Using the Plug-in (Pocket PC)

Launch Traveller

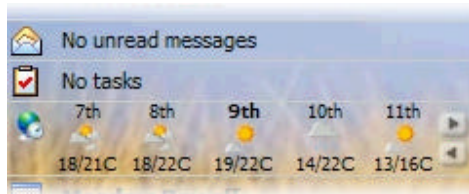

Tapping the Fizz Traveller icon on the left of the plug-in will launch Fizz Traveller.

City current day

This panel shows the city name, date, time and current day forecast if still valid. If the weather forecast had recently been downloaded, then the forecast for the next day may be shown.

**City 5 day forecast**

Tapping the panel will show the cities 5 day forecast

**City 2 day forecast - hours 0 to 24**

Tapping the panel again will show the first 24 hours of weather in 6-hour intervals for the city

City 2 day forecast - hours 24-48

Tapping the panel again will show the last 24 hours of weather in 6-hour intervals for the city

General Information

Tapping the arrows at the right hand side of the panel will move through your six favorite cities.

You must have Fizz Traveller 2 installed for the home screen plugin to function correctly.

You will need to have started Fizz Traveller 2 at least once before the home screen plugin shows any information. Weather will not show unless it has been downloaded from within Fizz Traveller.
